Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/2006 has been entered.

Claim Objections

2. Claim 63 is objected to because of the following informalities: line 2, the term "to supply power" should be changed to —to receive power—to be consistent with description in the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 63-69 are rejected under 35 U.S.C. 102(b) as being anticipated by Azuma et al (JP 03-005779).

Azuma et al disclose an image forming apparatus comprising a heat source Hs (Abstract, Fig. 2) to receive power from a storage device (i.e. battery 84, Abstract); a

fixing member (26a, Fig. 2) heating by the heat source (Abstract); a pressing member facing the fixing member (26b, Fig. 2); a sensor member (see step S32 for sensed temperature T, Fig. 7) to detect a temperature of the fixing member; a control device (100, Fig. 10) to control the storage device to supply power to the heat source when a temperature of the fixing member is decreased below a first reference temperature T0 from a starting timing of an image forming operation based on a rate or temperature decrease of the fixing apparatus (see Abstract, Fig. 8).

Azuma et al further disclose the control device to change the temperature from the first reference temperature T0 to a second reference temperature T1 which is higher than the first reference temperature when the temperature of the fixing member is decreased below the second reference temperature within a time period from a start of an image forming operation to a predetermined time (Figs. 7, 8, Abstract), within a time period from a start of an image forming operation to a time at which a predetermined number of sheets of paper have been processed (period b, Fig. 8), when the temperature of the fixing member is decreased below the second reference temperature (period c, Fig. 8).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Ngo whose telephone number is (571) 272-2138. The examiner can normally be reached on 6:00am - 2:30pm.
